- The Premium Amount is payable at the beginning of the year and the benefits provided in the illustration above are payable at the end of each year.
- Some benefits are guaranteed, and some benefits are variable with returns based on the future performance of the Company. If your policy offers guaranteed benefits, then these will be clearly marked “guaranteed” in the illustration table. If your policy offers variable benefits then the illustrations on this page will show two different rates of assumed future investment returns, of 8% p.a. and 4% p.a. These assumed rates of return are not guaranteed, and they are not the upper or lower limits of what you might get back, as the value of your policy is dependent on a number of factors including future investment performance.

- The Premium Amount is payable at the beginning of the year and the benefits provided in the illustration above are payable at the end of each year.
- Some benefits are guaranteed, and some benefits are variable with returns based on the future performance of the Company. If your policy offers guaranteed benefits, then these will be clearly marked “guaranteed” in the illustration table. If your policy offers variable benefits then the illustrations on this page will show two different rates of assumed future investment returns, of 8% p.a. and 4% p.a. These assumed rates of return are not guaranteed, and they are not the upper or lower limits of what you might get back, as the value of your policy is dependent on a number of factors including future investment performance.

Additional Benefits

1. Option to Accrue the Survival Benefits

At any point during the policy term, you will have the option to accumulate the survival benefits instead of cash payouts. Under this option, the survival benefits will accumulate at total of the following two rates:

- a. Guaranteed rate of 2% p.a. each year.
- b. Bonus rate declared by the Company each year based on the performance of the par fund.

The accrued survival benefits, if any, will be part of the participating fund.

The guaranteed rate and the bonus rate would be applicable on the accrued survival benefits at the beginning of the policy year unpaid till the end of the policy year

You can choose to withdraw the accrued survival benefit at any point during the policy term (0% to 100%,). The unpaid accrued survival benefit shall be paid along with other benefits payable at the time of termination of the policy due to death (second death or simultaneous death of both the life insured in case of Plan Option – Family Secure Option), maturity, or surrender. This option can be availed under an in-force as well as a reduced paid-up policy provided there is no outstanding loan at the time of opting for this option. In case you have opted for Accumulation and intend to take a loan, first the accrued survival benefits will be paid out and then the loan will be granted against the policy. You can choose to opt in or opt out of this feature multiple times and at any point during the policy term.

Enhance Protection through Riders

A rider is an add-on provision to the base plan. Riders can help in making your plan more comprehensive by paying a nominal premium. Riders can be added at the inception of the policy or at policy anniversary during the policy term subject to underwriting and terms and conditions of the riders.

Following riders are available with this plan:

- **Edelweiss Life - Income Benefit Rider (147B015V02):** This rider will make sure that your family has a backup source of monthly income even in your absence.
- **Edelweiss Life – Waiver of Premium Rider (UIN: 147B003V05):** This rider waives of future premiums in case you suffer from Critical Illness or Total and Permanent Disability due to accident.
- **Edelweiss Life – Payor Waiver Benefit Rider (UIN: 147B014V05):** This rider waives future premiums in case of death, Critical Illness or total and permanent disability due to accident of the proposer (payor) so that the Life Insured continues to get the benefits.

The premium pertaining to health riders shall not exceed 100% of premium under the basic plan, the premiums under all other life insurance riders put together shall not exceed 30% of premiums under the basic plan. Any benefit arising under each of the above-mentioned riders shall not exceed the Sum Assured on Death under the base plan. Rider will not be offered if the term of the rider exceeds outstanding term under the base policy. There is no overlap in benefit offered under different rider and rider benefits shall be payable separately in addition to benefits available under the base plan.

Any of the riders can be added only if the outstanding premium paying term of the base plan is at least 5 years and subject to the age, premium payment term and rider term limits of the respective riders.

The benefit offered under different riders are applicable only for the Primary Life Insured.

Policy Loan

A life insurance policy should be handy for you in case of any adverse financial emergencies and this plan caters to that, whereby you can avail a loan under the policy once the policy acquires surrender value.

Policy loan is available once the policy acquires surrender value. Maximum loan amount available will be 60% of the surrender value applicable under the Policy when a request for a loan is received less any outstanding Policy Loan plus accumulated/accrued interest, if any, on that date.

Interest will be charged on the outstanding loan amount at a rate declared by the Company from time to time based on then prevailing market conditions and will be equal to "Three-year (tenure) SBI MCLR + 0.50%, subject to floor of 7.00%". The loan interest rate will be declared by the company as and when there is a change in the three-year (tenure) SBI MCLR e.g., if the three-year (tenure) SBI MCLR gets revised w.e.f. 15th April 2024 then the revised rate will be applicable from 15th April 2024 till further revision in the loan interest rate. If the loan interest rate is revised, the same interest rate will be applied to both existing and new loans from the date of revision. The rate of interest on policy loan as of 15th October'23 is 9.25% compounded per annum. The interest rate methodology is reviewable with prior approval from IRDAI.

For other than in-force and fully paid-up policies, if at any point of time outstanding loan amount and accumulated interest balance equal or exceed surrender value, then the policy shall be terminated without value. Prior to this, the Company will notify the customer when his/her outstanding loan balance is 95% of the surrender value and will give an opportunity to repay all or part of the loan balance.

The outstanding loan amount and accumulated interest will be recovered from any benefits payable (including survival benefit, death benefit, maturity benefit) and rest of the benefit amount, if any, will be paid. For in-force and fully paid-up policies: Policy can't be foreclosed on the ground of outstanding loan amount including interest exceeding the surrender value.

Non-forfeiture Benefits

You shall pay the Premium for the entire Premium Paying Term. If agreed by us, you may change your Premium Paying Frequency during the Premium Paying Term, to any other Premium Paying Frequency as allowed under the plan.
