**NAV:**

The NAV or the net asset value is the total asset value per unit of the fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day.

**AUM:**

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by any investment firm.

**Holdings:**

The holdings or the portfolio is a Ulip's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

**Benchmark:**

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of our investments, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year G-sec.

**Sector allocation:**

Sector allocation may be defined as an allocation of funds in a certain percentage of the portfolio in different sectors of the economy.

**Asset allocation:**

Asset allocation is an investment strategy that aims to balance risk and reward by apportioning a portfolio's assets according to an individual's goals, risk tolerance and investment horizon. The three main asset classes -equities, fixed-income, and cash and equivalents -have different levels of risk and return & behave differently over time.

**Fund Manager:**

A fund manager is responsible for implementing a fund's investing strategy and managing its portfolio trading activities.

**Risk profile:**

A risk profile is an evaluation of an individual or organization's willingness to take risks, as well as the threats to which an organization is exposed. A risk profile is important for determining a proper investment asset allocation for a portfolio.

**Portfolio Duration:**

Portfolio Duration follows the concept that interest rates and bond prices move in opposite directions. This ratio is used to determine the effect that a 100-basis-point (1%) change in interest rates will have on the price of a bond.
